**Ridgetown, ON (February 26, 2020)** - KSR International Inc. has named Jim Tanner President & CEO. Mr. Tanner, 51, a native of the Metro Detroit area, has more than 28 years of manufacturing experience, and holds a Bachelor of Science in electrical engineering from Lawrence Technological University.

He was most recently Group President of MacLean Power Systems and worked for the Chicago-based privately held MacLean-Fogg Company for 11 years. He held various roles including Executive Vice President of Business Development for the company's automotive division.

Prior to MacLean-Fogg, Mr. Tanner worked 14 years at Robert Bosch Corporation starting in project management and moving into sales and marketing. He also did a two-year expatriate assignment in Stuttgart, Germany and is a fluent German speaker.

"We are confident that Jim's engineering background, extensive manufacturing experience and business development prowess will put the company on the right path for the future," said Kevin G. Douglas owner of KSR.

**About KSR International Inc.**

Since 1946, KSR has been an industry leader in designing, engineering and manufacturing of fixed pedal modules, electronic throttle controls and automotive sensors. In 1957, KSR redefined the traditional fixed pedal business and has since defined industry standards in brake pedal modules, traditional fixed systems and advanced adjustable systems. Each KSR module integrates brake, accelerator and clutch pedals in one engineered system. With seven locations on three continents, KSR's global footprint includes manufacturing facilities in North America, mainland Europe and Asia. Sales, R&D and engineering offices are in Canada, US, Germany, UK and China.
